---

## Summary

---

BSc CSIT (graduating 2025) student with 2 years of hands-on experience building with React, Next.js, and Node/Express through personal projects and an internship working alongside senior developers. JavaScript is my primary stack while I'm comfortable with MongoDB and SQL (currently getting into PostgreSQL). I write code that is thoughtful, maintainable, and something I can stand behind.

## Technical Skills

---

**Frontend:** JavaScript, React, Next.js, Typescript, Material-UI, Tailwind-CSS, HTML, CSS

**Backend:** Node.js, Express, REST APIs

**Database:** MongoDB, SQL

**Tools and Platforms:** Git and Github, Postman, Jira

## Projects

---

### Smart Blood Donor Recipient Matching system

*React, Node.js, Express, MongoDB, Tailwind-CSS, websocket, React Leaflet, OpenStreetMap*

- Built a unified platform for blood requests and donor matching based on geolocation distance using the Vincenty algorithm.
- Used React Leaflet and OpenStreetMap for geolocation features for map and collecting coordinates.
- Applied Naïve Bayes classification to predict donor willingness and improve match relevance.
- Enabled real-time donor-recipient communication via WebSocket.
- Built an admin dashboard for tracking and managing all platform data.

### National Budget Monitoring System

*React, Node.js, Express, MongoDB, Tailwind-CSS, Chart.js*

- Built a hierarchical budget management system across four government levels — National, Federal Ministry, Provincial, and Local.
- Enabled budget allocation and expenditure tracking per fiscal year, categorized by sector (e.g. Health, Education).
- Developed interactive charts using Chart.js to visualize spending trends across levels and fiscal years.
- Allowed public users to monitor budget and expenditure at each government level per fiscal year.

## HR Management System

(Internship Project) *Next.js, TypeScript, Material-UI, Redux, RTK Query, Storybook*

- Built employee onboarding and offboarding workflows including department management, checklist assignment, and document collection.
- Developed self-service onboarding forms for employees to complete their own setup process.
- Managed server state with RTK Query for efficient API data fetching and caching.
- Built and documented reusable UI components using Storybook for team-wide consistency.

## Experience

---

### Fronted Web Developer Intern

Alpinist Studio Pvt Ltd

Manbhawan Rd, Lalitpur 4460, 01-5432671

2025 December – 2026 March

- Developed and maintained features for an HR Management System built with Next.js, TypeScript, and Material-UI.
- Used Git and GitHub for collaborative code management in a team workflow.
- Collaborated with the team using Jira for task planning and tracking.

## Education

---

### Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

2022 – 2025

Nagarjuna College of Information Technology | TU university

Average Percentage : **85.58%**

## Certification

---

- **ReactJs** - Sikkai IT, 2024
- **Learn SQL Basics** - Programiz , April 2024, Credential ID: 2231A85DB41E

## Recommendation

---

- **Ashish Bajracharya** – Senior React Developer @ Alpinist Studio Pvt.Ltd  
Contact: **9843744536**
